

YPSOMED

SELFCARE SOLUTIONS

Ypsomed is the largest independent developer and manufacturer of custom-made injection systems for self administration. Our pens range from simple disposable pens to reusable pens with variable dosing and spring-assisted injection. We also manufacture unique click-on needles and safety pen needles which are compatible with our own and all other widely-available pens.

We are constantly expanding our platform portfolio to cover new therapy and patient needs, including disposable auto-injector platforms for the treatment of autoimmune diseases and other indications. A broad-based technology platform and over 300 patent families mean Ypsomed can meet virtually all partner needs in the growing market for self-injection systems.

All products are developed and manufactured in Switzerland, where internal capabilities include R&D, tool-making, injection moulding, clean-room production and assembly facilities. Ypsomed provides not only marketing and technological expertise but also production expertise according to the latest regulatory requirements, for both low and high-volume production. Ypsomed manufactures in FDA-registered facilities, is inspected regularly by its customers and regulatory authorities, and supplies devices approved for all leading markets including the US, Europe and Japan.

Ypsomed has well-established partnerships of many years with numerous leading pharmaceutical and biotech manufacturers such as Sanofi-Aventis, Pfizer, Roche/Genentech, Merck-Serono and Lilly.
